

MOURN THE DEAD

FIGHT LIKE HELL FOR THE LIVING

October 27, 2019 marks one year since the deadliest attack on Jewish people in the so-called United States – 11 people were martyred at the Tree of Life Synagogue in Pittsburgh, Pennsylvania.

Just this year, there have been even more outbreaks of white supremacist violence: Christchurch in March; San Diego in April; Gilroy in July; El Paso in August; the list goes on.

The Torch Antifascist Network reaffirms our commitment and solidarity to all people and communities threatened by white supremacy and their fantasies of ultra-violence. We intend to do the hard work necessary to build a broad, strong movement. We must support and protect each other to build a free society. Antifascism is self-defense. Antifascism is community defense.

An attack on one is an attack on all!

Martyrs Never Die!
